### LEARN THE FACTS.

**HPV, or human papillomavirus, is the most common sexually-transmitted infection.**

HPV is so common that nearly all sexually active men and women are infected with some HPV strain at some point in their lives. HPV can cause health problems like genital warts and cancer.

### THE HPV VACCINE:

- Prevents the HPV strains that cause genital warts; and cervical, vaginal, vulvar, anal, penile, and certain throat cancers.
- Recommended\* for females ages 11-26 and males ages 11-21 (although 26 for some).
- Available at little or no cost through insurance and other programs.
- Safe and effective.

**HPV VACCINATION IS CANCER PREVENTION.**
